# Schraubenzieher für Schlitzschrauben

## Beschreibung

---

With these so-called 'flat head' screwdrivers (also known as slotted screwdrivers) screws can be easily and quickly attached and removed. This type of screwdriver is usually used for screwdriving in softer materials. The Pard flat head screwdrivers are made of chrome vanadium and manufactured according to the applicable DIN standard. The professional screwdrivers are easy to handle, lightweight and have a long life span. The handle of the screwdrivers is made of an impact-resistant, unbreakable plastic. When used correctly, the screwdrivers are virtually unbreakable.
