

Slotted screwdriver

Description

With these so-called "slotted" screwdrivers, screws can be easily and quickly applied and removed. This type of screwdriver is usually used when screwing in softer materials. The Pard slotted screwdrivers are made of chromium vanadium and manufactured according to the current DIN standard. The professional screwdrivers are convenient, lightweight and have a long service life. The grip of the screwdriver is made of impact-resistant, unbreakable multicomponent material. With proper application, the screwdrivers are practically unbreakable.
