

Automatic centre punches

Description

Automatic centre punch with a needle made of galvanised tool steel. The marking force is set by tightening/loosening the knurled upper part of the housing in the range of +/- 10%. The needle can be replaced.

Model 306:

Suitable for medium-hard materials. This centre punch is suitable for marking soft structural steel (not hardened), aluminium alloys, composite materials and hard woods like oak, beech, merbau, wenge, rosewood, yatoba.

Max. impact force model 306: 20 kG.

Model 705B:

Powerful automatic punch with a "shot" force of approx. 75-85 kg, for clear, effective punching in steel. Features a knurled, blackened housing with plastic cover.

This punch can be converted with a special pin with an adapter for marking letters and numbers with a height of 3, 4 or 5 mm.

Extra information

Item number	RC430600000020	
Model	306
