

Industrial shelf rack extension element

Description

Heavy shelving for industrial use. Ideal for many working environments such as warehouse, workshop or car garage. These shelving racks are perfect for the temporary storage of products, pick stock, consumables, food industry, textiles, etc. Huvema's shelving racks are of European manufacture and are characterized by the high, heavy quality of galvanized steel, both the rack and the shelves that are incorporated in it.

Huvema supplies the base element as standard in a width of 1000 mm with a depth of 500 mm, in this variant all 5 shelves can carry up to 300 KG. The shelves consist of 4 separate shelves, so that the carrying capacity is very well distributed and therefore has more capacity.

The K20922 is the extension element, which can be connected to our [K20921](#).

Need other dimensions or capacity? Or are you looking for more or less shelves? Send us an email, call or ask your question via the "ask your question" button and we will offer you the model you requested without obligation.
