

Compressor pump

Description

The AB series distinguishes oil-lubricated two-cylinder compressor pumps with one- and two-stage belt drives. These compressor pumps are designed and tested according to the strictest international standards, with special attention to noise reduction and elimination of the heat generated during operation.

The Italian brand Fiac has been known for the high quality of its products for 40 years. The user-friendly, but high quality products are very suitable for both professional and private users.

Extra information

Item number	21112	
Model	CPP AB 598	
EAN	8718242578950	
Article group	HUVEMA Parts	
Brand	Huvema	
Features	Working pressure maximum	10 bar
	Suction volume	600 l/min
	Effective pumping power	450 l/min
	Number of cylinders	2 pcs
	Weight	17 kg
Article group code	2237574
