

Heavy duty roller stand V-shape

Description

This heavy duty roller stand is the perfect option for moving long material through any machine. Thanks to the V-shape, you keep the material aligned and centered. The roller stand comes with 2 solid steel ball-bearing rollers, which assist with infeed and outfeed. With its V-shape, this roller stand is especially suitable for processing round material. The heavy cast iron base helps this robust roller stand to support round wood, tubes, pipes, etc. in metal and woodworking up to 800 kg. With three holes in the base, the roller stand can even be bolted to the floor for greater stability. The working height of the material support can be easily adjusted from 580 to 970 mm.

Features:

- Roll diameter: 52 mm
- Ball-bearing solid steel rollers
- Working height adjustable between 580-970 mm.
- Maximum load capacity: 800 kg.
- Heavy built according to industrial standards
- Powder coated for extra strength

Extra information

Item number	16826	
Model	HU GT-V-1R	
EAN	8718242579193	
Article group	HUVEMA Werkplaatsinrichting	
Brand	Huvema	
Features	Working height	580 - 970 mm
	Max. bearing strength	800 kg
	Diameter rollers	52 mm
	Dimensions l x b x h	540 x 510 x 90 mm
	Weight	15 kg
Article group code	2446536
