

Welding gloves

Description

The welding gloves are so long that your wrists and forearms are also well protected when you are working.

With these TIG welding gloves from Telwin you can continue to move your fingers smoothly while welding.

The welding gloves comply with the European guidelines regarding personal protective equipment (PPE).

Safety during welding is paramount and the Telwin TIG welding gloves protect your hands and forearms against sparks, splashes and any harmful radiation that may be released during your work. The Telwin TIG welding gloves are designed for use with TIG welding machines.

About the Telwin TIG welding gloves

Heat-resistant, comfortable and high quality. Those are Telwin's welding gloves. You need these gloves to protect your hands, wrists and forearms when you are TIG welding. The fingers of these gloves are made of supple and soft leather, so you can keep moving your fingers while you are working. This is of course important, especially with TIG welding. When welding, it is important to protect yourself well against sparks and heat.
