

Hydraulic shear

Description

Stable steel folding machine, resistant to vibrations and temperature changes. Equipped with a hydraulic transmission system and a motorized catcher (99 programs and 20 cycles per program) with digital readout. The distance between the blades can be adjusted accurately with the hand wheel. The cutting angle can be adjusted to prevent too high pressure on the material.

Properties:

- opening adjustable
- cutting line is lit
- photocell protection on the rear
- control panel for the safety cage
- emergency stop
- foot pedal
- including hydraulic oil
- table placement over bearings
- pneumatic catch box
